PROFESSIONAL SUMMARY

Versatile Software Developer and Digital Compositor with over 6 years of technical production pipeline experience. Unique hybrid profile bridging high-end VFX artistry with clean, robust software engineering principles to build fast web applications, desktop utilities, and automated workflow pipelines. Adept at solving complex operational bottlenecks, managing cross-departmental data integrations, and delivering enterprise-grade solutions in high-pressure, deadline-driven environments.

TECHNICAL SKILLS

Languages: Python (3.13+), TypeScript, JavaScript, SQL, HTML5, CSS3
VFX & Pipeline: Nuke, After Effects, DaVinci Resolve, ShotGrid workflows, FFmpeg / FFprobe
UI Frameworks: PySide6 (Qt for Python), React (v19), Next.js 15 (App Router), Tailwind CSS (v4), Shadcn/UI
Backend & APIs: Node.js, Bun, Express, REST APIs, Server Actions
DevOps & DB: PostgreSQL, MongoDB, Prisma ORM, Git, GitHub Actions (CI/CD), Railway

FEATURED PROJECTS

Plate — github.com/edgarciaavfx/plate **Creator & Lead Engineer**

- **Concept:** Developing a high-performance desktop utility for VFX and AI artists to replace multi-step Nuke ingestion workflows with a focused, rapid video-to-EXR sequence exporter.
- **Architecture:** Engineering the application utilizing Python 3.13+ and PySide6 for a responsive, cross-platform native GUI.
- **Media Processing:** Integrating FFmpeg and FFprobe on the system backend to achieve precise video decoding, playback functionality, and fast frame-range marker extractions.

Production Asset Tracker — [Enterprise-Grade Web Application](#) **Creator & Lead Engineer**

- **Core Architecture:** Engineered a Next.js App Router application leveraging React Server Components (RSC) and type-safe Server Actions for low-latency asset management.
- **Pipeline Tracking Dashboard:** Architected a comprehensive asset, shot, and task-tracking dashboard inspired by industry-standard ShotGrid, integrating real-time workflow analytics via Recharts.
- **Data Integrity & Security:** Built a PostgreSQL database with Prisma ORM utilizing composite query indexing and transactions for unique string code generation. Implemented server-side Role-Based Access Control (RBAC) and Zod schema validations.

PROFESSIONAL EXPERIENCE

Ingenuity Studios Inc. **Oct 2021 – Oct 2024**

Digital Compositor (Contractor)

- Collaborated with pipeline engineers, technical supervisors, and artists to maintain workflow efficiencies within massive automated client pipelines.
- Investigated, isolated, and debugged complex operational bottlenecks and data integration issues within high-pressure live environments.
- Spearheaded cross-functional data handling and asset problem-solving, rapidly adapting to internal script bases and pipeline architectures to ensure high-volume delivery.

La Covacha

Apr 2020 – Apr 2021

Postproduction Artist

- Engineered precise, logic-driven node environments (Nuke, After Effects) to streamline asset compilation, optimizing rendering speeds and output performance.
- Worked cross-departmentally in rapid iteration cycles, managing direct product feedback loops to maintain optimal production standards.

MPC

Sep 2019 – Dec 2019

Compositing Artist

- Integrated highly complex CG and visual elements into commercial packages, enforcing strict zero-fault asset metrics and delivery standards.

LFT Studio

Dec 2017 – Jun 2018

VFX Generalist

- Built, optimized, and deployed 2D and 3D data components across short-deadline digital frameworks.

| EDUCATION

Vancouver Film School

Diploma, 3D Animation and Visual Effects

Universidad Marista

Bachelor's Degree, 3D Animation and Videogames

UNIAT

Diploma, Digital Compositing in Nuke
