Guadalajara, MX · remote, Pacific hours
Spanish (native) · English (professional)

Compositor with feature and episodic work at MPC Vancouver and Ingenuity Studios (Los Angeles, remote). I composite in Nuke and build the tools around the shot: plate prep, ComfyUI mattes and tracking, and Python delivery automation, so AI output reaches the same standard as the rest of the show.

EXPERIENCE

Post-production & VFX Artist · La Covacha Gabinete Audiovisual, Guadalajara — Sep 2026 – Present

- Finish fast-turnaround campaign spots in horizontal and vertical deliverables: compositing, color, supers and face blur in After Effects and DaVinci Resolve.
- Built a scripted post pipeline around the editor's cut: scene-cut detection, base grade, headless renders and automated checks that every client note made it into the delivery.
- Run ComfyUI matte and cleanup loops that are scored against hand roto before anything is comped back over the plate.

Business process & software · Independent consultant, Jalisco — Jul 2026 – Present

- On-site process review for a medical-apparel manufacturer; development of the agreed software starts November 2026.

Career development · Software development, Self-directed — Oct 2024 – Jul 2026

- Two years of full-stack study (TypeScript, Node, React, Python); Codecademy Full-Stack certification, March 2026.
- Shipped compositor tools: plateprep on PyPI and comfyui-platetrack on the Comfy Registry.

Digital Compositor (contract) · Ingenuity Studios, Los Angeles (remote) — Oct 2021 – Oct 2024

- Shot work on network and streaming series and features, from Abbott Elementary through Horizon: An American Saga.
- CG integration (a CG globe; a CG arm carried across amputation, blood and bruise continuity), keying with CG environments and matte paintings, and fire, smoke, blood and rain element work in Nuke.
- Delivered remotely to a Los Angeles pipeline on Pacific hours for three years, through the 2023 strikes.

Post-production Artist · La Covacha Gabinete Audiovisual, Guadalajara — Apr 2020 – Apr 2021

- Compositing, Mocha tracking, color in DaVinci Resolve and motion graphics in After Effects and Illustrator for ads and campaigns.

Compositing Artist · MPC, Vancouver — Sep 2019 – Dec 2019

- First feature: Sonic the Hedgehog (2020). Deep compositing, god rays, the Eggman vs. Sonic ramp-up and blue lightning, until the Vancouver studio closed in December 2019.

SHOWS CONTRIBUTED TO

Sonic the Hedgehog · MPC
Abbott Elementary · Ingenuity Studios
Horizon: An American Saga · Ingenuity Studios

uncredited compositing work

SKILLS

`COMPOSITING`
Nuke · After Effects · Mocha Pro · DaVinci Resolve Studio

`CRAFT`
CG integration · keying · roto/paint · deep comp · set extension · FX elements · color

`ML / AI`
ComfyUI (custom nodes, API automation) · ML mattes · AI plate cleanup · generative plates

`CODE`
Python (PySide6, FFmpeg) · TypeScript/Node · ExtendScript · Git

`3D`
Maya · 3ds Max · Unity (training)

TOOLS I BUILT

`PLATEPREP`
PyPI
Plate prep desktop tool (PySide6 + FFmpeg): ingest, proxies, slates.

`COMFYUI-PLATETRACK`
Comfy Registry
Planar/point tracking node for ComfyUI.

EDUCATION

`2018–2019 · VANCOUVER FILM SCHOOL`
Diploma, 3D Animation & Visual Effects (compositing focus)

`2014–2018 · UNIVERSIDAD MARISTA DE GUADALAJARA`
B.A. Animation & Video Game Development (2nd cohort)

`2011–2015 · UNIAT`
Diplomas in Nuke, Maya, 3ds Max and Unity
